RE: Study Participant Safety Measures at ProSciento

Dear valued study participant,

At ProSciento, we have taken multiple precautions to be compliant with state and local regulations and to prevent the spread of the new coronavirus, or COVID-19. We are committed to keeping all of our study participants and staff healthy and safe.

COVID-19 antigen and antibody testing protocols for staff and study participants will be established and made available.

All study participants and staff have temperature checks done prior to entrance. Anyone with a temperature check of 100.0 F or greater is sent home and asked to follow their primary health care provider's guidance.

All staff are fully gowned with Personal Protective Equipment (PPE) and interactions are limited to essential activities.

Study participants are screened on the phone the day before their arrival to check for symptoms. They also receive a questionnaire in advance so that we can obtain information about recent travel history, possible exposure, behaviors, and symptoms.

Strict guidelines are enforced for 6 feet distancing and maximum number of people in designated areas throughout our clinic.

Examination and patient areas are sanitized thoroughly using medical grade cleaners after patient leave or are discharged.

These guidelines are continuously monitored by our ProSciento Preparedness Team. To reach our support line, please call 619-427-1300 or email us at [info@prosciento.com](mailto:info@prosciento.com).

Thank you,  
**The ProSciento Preparedness Team**

To reach our support line, please call 619-427-1300 or email us at [info@prosciento.com](mailto:info@prosciento.com).

# COVID-19 FACILITY/STAFF PRECAUTIONARY MEASURES

All study participants and staff will have temperature checks done prior to entrance. Anyone with a temperature check of 100.0 F or greater will be sent home and asked to follow their primary health care provider's guidance.

All our staff are fully gowned with Personal Protective Equipment (PPE) including face shield, hat, mask, gloves, and shoe covers within our facility.

Strict guidelines will be enforced for 6' distancing and maximum number of people in designated areas throughout our clinic.

All common areas, rooms, and beds are thoroughly sanitized using medical grade cleaners.

All study participants will be screened and provided with a questionnaire, in advance, to obtain information about recent travel history, possible exposure, behaviors, and symptoms.
